</table>

Section II – Elevation Information

1. Elevation of Lowest Floor ………………………………………………………………. ft.
2. Base Flood Elevation ………………………………………………………………. ft.
3. Depth Number ………………………………………………………………………….. ft.
4. Elevation of Highest Adjacent Grade …………………………………………. ft.
5. Elevation of Lowest Adjacent Grade …………………………………………. ft.
6. Elevation to which Structures are Floodproofed ………………………………… ft.

Section III – Standard Certification Statement

The plans, specifications and methods of construction for the proposed project are in accordance with accepted standards of practice for meeting the provisions of the Flood Hazard Ordinance, and:

1. Comply with the standards and requirements of the Flood Hazard Area Regulations of the Revised Ordinances of Honolulu;
2. Conform to the flood elevations of the Federal Emergency Management Agency Flood Insurance Rate Maps (FIRM); and
3. Are adequate to resist the regulatory flood forces; do not increase flood elevations; and do not affect flooding on surrounding properties;
4. The bottom of the lowest horizontal structural member of the lowest floor (excluding the pilings or columns) is elevated to or above the regulatory flood elevation; and
5. The pile or column foundation and structure attached thereto is anchored to resist floatation, collapse and lateral movement due to the effects of wind and water loads acting simultaneously on all building components.
Section IV – Certification

Project plans and specifications include:

1. The location of flood hazard boundaries;
2. Existing and proposed elevations of the property in relation to the elevation reference marks on the Federal Flood Maps;
3. The flood elevations, velocity and other data from the Federal Flood Maps and study;
4. Existing and proposed structures, utilities and improvements; and
5. Proposed flood proofing measures and improvements.

This certification is conditioned upon the actual construction of the project being in strict accordance with the plans and specifications as stamped and signed by me.
